

## Big Changes at Avantgate

Avantgate are very pleased to announce some exciting new changes to our services.

### Website

If you haven't already noticed we have a new website that better represents the wide range of services we offer. Visit [www.avantgate.com](http://www.avantgate.com) to check out the great new design. We'd love to hear your comments - please email us on [info@avantgate.com](mailto:info@avantgate.com).

### New Website Hosting Packages

When we launched our new website we also launched a revamped website hosting service. You still get the same great control panel, but now it comes with even more features. If you don't know how to access your hosting control panel please contact us and we'll be more than happy to help! The hosting control panel now includes support for Tomcat and ColdFusion. It also has an application manager that will install useful server applications for you in a matter of minutes, like an online poll or shopping cart (note these will usually need to be integrated with your existing website).

The new package includes all the great free features our old package did, but it comes with a huge 500MB of disk space and 1GB of bandwidth (national and international traffic). To make things really simple we now just offer one package, instead of our previous hosting plans.

### Price Change

No matter what your website requires it now starts on a base rate of \$36 per month. We realise this may represent a price increase for some of you. This was necessary for Avantgate to continue investing in the premium website hosting we're committed to.

An extra 1GB of bandwidth is \$17 per month. With every 1GB of bandwidth we'll give you another 250MB of disk space! Bandwidth is purchased as you need it and billed in arrears. The bandwidth a website consumes is strongly linked to the hosting performance it requires. Changing the structure of our website hosting means your dollars translate to the performance your website needs.

### Services

You may not know that we offer a broad range of services and our team has grown. We specialise in business and IT consulting; website design, development, and hosting; data protection; brand development; and graphic design. If you would like to discuss any of these please just give us a call on the number above or for more information visit [www.avantgate.com](http://www.avantgate.com).

Thank you for using Avantgate services!
